

AWILCO INVERTER TRUE SINE 3000W

- > **TOP PROFESSIONAL**
- > **HIGH MAX. PEAK**
- > **ENERGY SAVING FUNCTION**

TOP PROFESSIONAL INVERTER FOR INDUSTRIAL POWER TOOLS AND START UP FOR MOST 230V MACHINES

Top professional 3000W inverter with 6000W peak providing 230V for both industrial power tools, RV / caravans and as start up for most 230V machines.

The AW1230 is a very powerful and robustly designed inverter that allows you to connect all your power tools, charge batteries for battery tools and even start large 230V machines with power from the car's 12V battery and generator.

No more need to look for sockets when you're out at work: With the AW1230 you always have 230V power with you in your car. The AW1230 is also particularly suitable for leisure use in both caravans and motorhomes, where it provides 230V for TV, computer, fridge, freezer and vacuum cleaner.

The inverter can supply several 230V units and is at the same time protected against overload and underload as well as short circuit. In addition, a built-in UPS (Uninterruptible Power Supply) ensures that the inverter switches between mains and battery without affecting the supply.

The AW1230 is connected directly to the generator/battery of the vehicle and it also supports charging from a solar panel. The inverter is equipped with a practical LCD info display, so you can follow charging, consumption, connections and possibly errors, and the quiet fan means that it can be easily installed anywhere without disturbing.

> FEATURES

- 3000W pure sine (6000W peak)
- LCD info display
- 1 Schuko socket
- UPS function
- Eco mode
- Remote control included
- Quiet fan
- Supports charging from solar panel
- Robust compact housing
- Operating temperature -20° to +45° C.

> SPECIFICATIONS

MODEL	AW1230EU-R
AMPERE	13A
OUTPUT POWER	3000W
OUTPUT VOLTAGE	230V AC
OUTPUT POWER PEAK	6000W
INPUT VOLTAGE	12V DC
EFFICIENCY	>89-92%
PLUGS	1 Schuko 1 USB-A Anderson Mini Connector
BUILT IN SOLAR REGULATOR	Yes
REMOTE CONTROL INCLUDED	Yes
ECO-MODE	Yes
DISPLAY	Yes
WEIGHT	6.8 kg
DIMENSIONS	103*486*278 mm (H*L*W)
OPERATING TEMPERATURE	-20 to +50°C
STORAGE TEMPERATURE	0 to +50°C
DANGEROUS GOODS	No
CERTIFICATIONS	CE

The AW1220 has both Schuko and USB-A plugs and supports solar charging via Anderson Mini Connector.
