PROFESSIONAL INVERTER PROVIDING 230V FOR POWER TOOLS, BATTERY CHARGING AND RV / CARAVAN

Professional 2000W inverter providing 230V for both power tools, battery charging and all your equipment in the RV and Caravan.

The AW1220 is a powerful and robustly designed inverter that allows you to connect your power tool and charge batteries for cordless tools from the car's 12V battery and generator.

No need to look for sockets when you're out at work – with the AW1220 you always have 230V power with you in your car. The AW1220 is also suitable for leisure use in caravans and motorhomes, where it provides 230V for TV, computer and fridge.

The inverter easily supplies several 230V devices and is also protected against overload and underload as well as short circuit.

The AW1220 is connected directly to the generator/battery of the vehicle. It also supports charging from a solar panel. Moreover the inverter is equipped with a practical and informative LCD info display, so you can follow charging, consumption, connections and possibly errors, and the quiet fan means that it can be easily installed anywhere without disturbing.

> FEATURES

- 2000W pure sine (4000W peak)
- LCD info display
- 2 Schuko sockets
- Eco mode
- Remote control included
- Quiet fan
- Supports charging from solar panel
- Robust compact housing
- Operating temperature -20° to +45° C.
