

AWILCO INVERTER TRUE SINE 1000W

- > **ROBUST AND COMPACT**
- > **ENERGY SAVING FUNCTION**
- > **BUILT-IN UPS**

PROFESSIONAL INVERTER FOR BOTH POWER TOOLS AND ELECTRICAL RV / CARAVAN EQUIPMENT

The AW1210 is a professional 1000W inverter providing 230V for both power tools, battery charging and electrical RV / caravan equipment.

AW1210 is a compact and robust inverter that allows you to connect your power tool and charge batteries for cordless tools from the car's 12V battery and generator.

No need to look for sockets when you're out at work - with the AW1210 you always have 230V power with you in your car. The AW1210 is also suitable for leisure use in the RV or caravan, where it provides 230V for your TV, mobile phone and computer.

The inverter can supply several 230V units and is at the same time protected against overload and underload as well as short circuit. In addition, a built-in UPS (Uninterruptible Power Supply) ensures that the inverter switches between mains and battery without affecting the supply.

The AW1210 is connected directly to the vehicle's generator/battery. It also supports charging from a solar panel. The inverter is equipped with LED indicators for e.g. solar panel, UPS and fault notification, and the quiet fan means that it can easily be installed anywhere without disturbing.

> FEATURES

- 1000W pure sine (2000W peak)
- LED indicators
- 1 Schuko socket
- UPS function
- Remote control included
- Quiet fan
- Supports charging from solar panel
- Robust compact housing
- Operating temperature -20° to +50° C.

> SPECIFICATIONS

MODEL	AW1210EU-R
AMPERE	4,3A
OUTPUT POWER	1000W
OUTPUT VOLTAGE	230V AC
OUTPUT POWER PEAK	2000W
INPUT VOLTAGE	12V DC
EFFICIENCY	>89-92%
PLUGS	1 Schuko 1 USB-A Anderson Mini Connector
BUILT IN SOLAR REGULATOR	Yes
REMOTE CONTROL INCLUDED	Yes
ECO-MODE	No
DISPLAY	Yes
WEIGHT	2.73 kg
DIMENSIONS	79*378*209 mm (H*L*W)
OPERATING TEMPERATURE	-20 to +50°C
STORAGE TEMPERATURE	0 to +50°C
DANGEROUS GOODS	No
CERTIFICATIONS	CE

The AW1210 has both Schuko and USB-A plugs and supports solar charging via Anderson Mini Connector.
